¹ For the purpose of this publication, the terms " country" and " countries" cover countries, territories and areas.

² Risk of yellow fever transmission is defined as yellow fever being currently reported or having been reported in the past and presence of vectors and animal reservoirs representing a potential risk of infection and transmission. In the 2011 edition of *International Travel and Health*, Sao Tome and Principe, the United Republic of Tanzania as well as selected areas of Eritrea, Somalia and Zambia were reclassified as " areas with low potential for exposure" for yellow fever (Country list).

³ Includes yellow fever vaccination requirement for travellers having transited through the airport of a country with risk of yellow fever transmission.
